

Role: AI Engineer – Agentic AI & Automation
Availability: April 2025 – Present
Language: English – Professional
Location: Chennai, India (Open to travel)
Daily Rate: [To be filled as per client requirement]

Position: AI Engineer – Agentic AI & Automation		Office: Cologne		Nationality: Indian	
Education		Professional experience		Key projects	
2020-2024	Bachelor of Technology - Information Technology at MEC, India	since 2025	Agamx Technology Solutions – AI Engineer	Agentic AI Workflow Automation - Built a stateful multi-agent system with LangGraph supporting interruptible execution, check pointers, and persistent thread memory. - Implemented human-in-the-loop control plane with escalation workflows and webhook-based resume triggers - Enabled structured LLM extraction pipelines for automated response processing across enterprise communication systems. Enterprise Knowledge Assistant - Designed a production RAG pipeline with semantic retrieval, document fingerprinting, and real-time knowledge base synchronization. - Implemented multi-layer guardrails for prompt injection prevention and sensitive data protection. - Built end-to-end observability and cost tracking, including token usage and response attribution	
		2024-2025	Conceptvines Technology Solutions – Software Engineer		
Technical skills		Project skills			
AI / LLM Systems: LangChain, LangGraph, RAG pipelines, Multi-Agent Orchestration, Prompt Engineering, Guardrails, Token Cost Governance, Langsmith. Backend Engineering: Python, FastAPI, Microservices Architecture. Frontend: React, Next.js, WebRtc, Websocket Databases: PostgreSQL, Neo4j,MongoDB, VectorDB. Cloud & DevOps: AWS, GCP, Docker, Git, CI/CD.		- Designing multi-agent workflow with stateful execution, memory management, and human in loop control. - Developing structured pipeline with prompt orchestration, model delegation, output parsing, guardrails, and handling failure. - Designing scalable API and services using FastAPI, Microservices Architecture, Event driven systems. - Implementing tracing, token tracking, monitoring, - Architecting relational storage system with optimized schemas.			
Certifications					
- Gen AI Professional – Oracle - AWS Cloud Practitioner – AWS - Graph Database Certified Professional – Neo4j - Agentic AI Professional – LangChain Academy
